Title:

Interior of Apollo Mission Simulator crew station

Description:

Interior view of the Apollo Mission Simulator (AMS) crew station located in bldg 5. The AMS is a primary training system which will prepare Apollo astronauts for flights. The AMS stands nearly 30 feet high and weighs approximately 40 tons. The simulator is designed to familiarize Apollo crews with equipment, crew tasks, mission procedures, and emergency flight situations.

Title:

Frogmen on Apollo command module boilerplate flotation collar during recovery

Description:

Apollo command module boilerplate floats in the Atlantic Ocean during a practice recovery exercise. Frogmen in a liferaft and on the flotation collar secure the command module boilerplate for hoisting onto a nearby recovery ship. The exercise was conducted in preparation for the forthcoming Apollo-Saturn 201 (AS-201) mission.
